

Worksheets

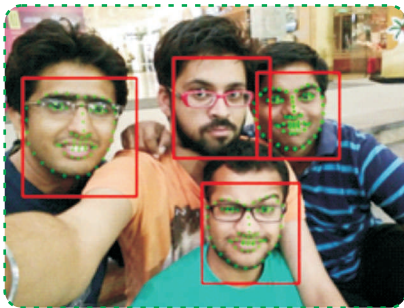

I. Help Harish to arrange the following NLP processing statements in proper order.

A typical human-computer interaction based on NLP might go as follows:

- The machine plays an audio file in response to the human
- The human says something to the machine
- The processed data is converted back to audio
- The captured audio is converted to text
- The machine captures the audio
- The text's data is processed

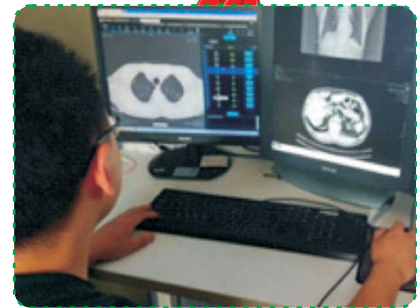

II. Help Navya to write down names of applications of CV.
